- News section of the website :

News can be added/ edited/ removed from the list by admin. The news auto-scroll upwards.

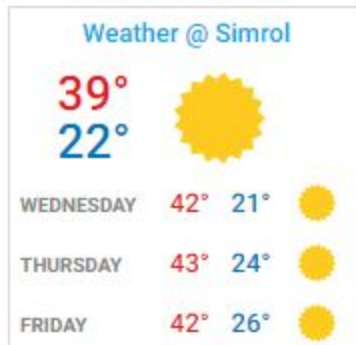

The screenshot shows the Django administration interface for adding a new news item. The browser address bar displays 'localhost:8000/admin/xyz/news/add/'. The page header includes 'Django administration' and a welcome message for 'ZEESHAN'. The breadcrumb trail is 'Home > Xyz > Newss > Add news'. The main content area is titled 'Add news' and contains a form with the following fields: 'News text:' with a text input box, and 'Date published:' with separate input boxes for 'Date' and 'Time', each accompanied by a 'Today' or 'Now' button and a calendar/clock icon. A note below the date fields states 'Note: You are 7 hours behind server time.' At the bottom right of the form, there are three buttons: 'Save and add another', 'Save and continue editing', and 'SAVE'.

- Admin feature to add a particular news.

The screenshot shows the Django administration interface for selecting news items to edit or delete. The browser address bar displays 'localhost:8000/admin/xyz/news/'. The page header is the same as the previous screenshot. The breadcrumb trail is 'Home > Xyz > Newss'. The main content area is titled 'Select news to change' and includes an 'ADD NEWS +' button. Below the title, there is an 'Action:' dropdown menu and a 'Go' button, with a status '0 of 5 selected'. A table lists five news items, each with a checkbox for selection. The items are: 'IIT Indore announces two new courses for Astronomy', 'A minor course in Astronomy has been added for third semester Btech program', 'IIT Indore invites applications for PhD programs in the department of Astronomy', 'Astronomy Club has its first Star Gazing event for the academic year 2016-2017', and 'New recruits for the Astronomy Club'. At the bottom of the table, it says '5 newss'.

- Admin feature to edit/ delete a particular news. You can see the list of the news items which are there on the main website.

- Weather update section on the main website. It displays the maximum and minimum temperatures of the current day and the following three days. Right now, the data is collected from a remote website, as per the suggestion of client.
